

How Jaypar can help to LifeScience industry.

Market forces and executive mandates fuel the need for business transformation – as a result, many organizations are facing the decision to outsource one or more of their major processes. Jaypar provides a unique blend of IT expertise, compliance knowledge, and practical experience that will help your organization prosper in this demanding industry. We help our clients challenges through:

- ✔ Lower cost and higher IT performance
- ✔ Business performance monitoring
- ✔ Regulatory compliance
- ✔ Service innovation and development

Jaypar provides technology solutions and services to bio pharmaceutical companies, healthcare providers, and educational & research institutes.

Our offerings include large-scale data management and specialized product engineering for life sciences, services for drug discovery and development, electronic medical records, personalized health services, and data analytics.

JAYPAR Healthcare and Life Sciences is a full-spectrum partner to the global healthcare and biopharmaceutical industry.

From bioinformatics to electronic clinical trials, Jaypar has been in the forefront of delivering solutions in the Life Sciences arena. Jaypar has assisted its clients in planning, and implementing the right technology solutions to meet their needs. Jaypar Life Sciences activities can be broadly classified under the following services:

- ✔ Product Design and Development: Jaypar Life Sciences is actively involved in the in-house design and development of analytical tools to be used by Life Sciences and Healthcare practitioners.
- ✔ Healthcare products include Electronic Medical Record (EMR) and Hospital Information Management System (HIMS) having multiple modules aimed at specific functionality.
- ✔ Customized Solutions: The capabilities of functional analysis and data mining, by using sophisticated and high-end tools and technologies. These services could be provided onsite or off shore depending on customer needs and project feasibility.
- ✔ Corporate Training: Short-term customized corporate training is made available to the professionals in Pharma and Biotech industries in different aspects of Computational Biology and Drug Design.

Jaypar utilizes strategic and tactical approaches to deliver our Life Science domain capabilities. These approaches include:

- ✔ Business Process Improvement
- ✔ Program and Project Management
- ✔ System Implementation
- ✔ Training

The fusion of our expertise in Life Science Consultancy, Regulatory Compliance / Quality, and IT uniquely qualify us to quickly assess opportunities based on proven solutions; supported by economic justification. We will help you quantify the benefit and measure the results to ensure sustainability.
